

A GAME BY  
JASON MORNINGSTAR

# NIGHT WITCHES

## BLOOD AND TERROR

There was a night bomber regiment in World War Two composed entirely of **natural-born Soviet airwomen**. These 200 women and girls, flying outdated biplanes near the front lines, attacked German forces every night. **When they ran out of bombs they dropped railroad ties.**

**To each other they were sisters.** To the Red Army Air Force they were an infuriating sideshow. To the Germans they were *Nachthexen*—**Night Witches**.

**Night Witches is a tabletop role-playing game about women at war.** Can you do your duty and strike back against the Fascists? Can you overcome discrimination and outright sabotage and rise above your sexist comrades? Are there limits to patriotism—or endurance? **Play Night Witches and find out!**

Night Witches requires 3-5 players, who will take turns in the role of game master during the game. It can be played for a single two-hour session or expanded into a literal campaign **following the Regiment across World War Two.**

Either way, **you'll tell an epic tale of heroism and sacrifice** that honors the women who did it for real.
